

# 2005'S GIANT GRAB BAG.

## PUT YOUR BEST FOOT FORWARD

THE SPERRY SHOE, with its slip-resistant sole was invented in 1935 and is now synonymous with boating worldwide. Since their introduction, Sperry Top-Siders have become a way of life. Sperry's collection of boat shoes has set the standard with innovation in boating footwear, and continues to dominate the market and is *the* choice of boaters' footwear across the globe.

Sperry's new Figawi range has an active drainage system for quick drying, airmesh for dynamic fit and durability, as well as a reinforced lacing system for a secure fit, stability and confidence. The sole of the shoe offers all-day under-foot comfort and stability. And the outer sole provides a grip for ultimate wet and dry traction. These factors make the new Figawi range the perfect shoe for boaters, all day and in all conditions.

Slip into a pair soon, you won't regret it!

## GET YOUR SHINE ON!

EVERY FIBREGLASS BOAT owner wants their gelcoat to have a shiny, factory-fresh appearance. Maintaining that new boat look often requires time, effort and the use of multiple step products. 3M Marine eliminates most of these problems with its one-step Fibreglass Restorer and Wax. Designed especially for removing oxidation and chalking, this product is also effective at eliminating minor scratches, exhaust stains, fading and rust marks. Its unique formulation contains both rubbing compound and a special blend of waxes.

Sun, rain and saltwater spray take a heavy toll on upholstery, trim and other boat surfaces. With a quick spray and wipe of Marine Vinyl Cleaner and Restorer from 3M Marine, these weathered surfaces will look like new again.

EACH YEAR THE BOAT SHOW CIRCUIT HAS A NUMBER OF NEW BOATING PRODUCTS AND ITEMS OF INTEREST FOR YOU TO FEAST YOUR EYES ON. 2005 IS NO DIFFERENT. ENJOY.

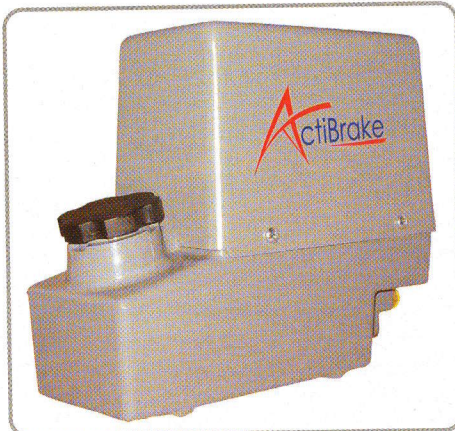

## HI-TECH TRAILER BRAKES

THERE IS NOTHING scarier than trying to control a trailer over 2000kgs when your electric or hydraulic drum brakes are fading due to overheating. Titan Trailer Brakes has introduced a fully proportional, totally intelligent, full safety electro/hydraulic braking system for ALL boat trailers over 2 tonne.

ActiBrake has been developed in conjunction with Titan's US partner over a four year period and the two concerns are confident ActiBrake meets all current and future requirements needed to meet Australian Design Rules. The safety benefits of the system include ABS braking for towed trailers and remote radio frequency control (no more in-cabin wiring and installation problems). X-Tender Hold unloads the pump and locks the brakes when stopped at traffic lights or holding on a hill, and importantly forward and reverse braking or reversing down a ramp – it makes no difference.

## FEND FOR YOUR FENDERS

FENDERCOVERS, import and distribute the Fenderfits range of fender covers and Ropesox rope covers. Fenderfits are made from a high quality tight knit synthetic loop to provide protection to your boat's delicate gelcoat surface. Your boat's fenders attract dirt from the water and air, making their surface "sticky" and abrasive. Once these fenders are used against your boat's hull, this abrasive surface slowly rubs away your gelcoat, leaving it with a number of fine scratches. Custom painted

hulls will also fade as the paint is transferred to the fender through this rubbing motion.

They come in blue or black to suit your vessel's trim and can be custom embroidered with your boats name and/or logo.

## TRAILER BEARING PROTECTION

IT'S NO SECRET that oil is a much better lubricant than grease. For years, the trucking industry has been using oil bath systems for their trailer hubs which has proven to be safer and more efficient, but no such system has been made available for the domestic market
